

A hand is pouring dark coffee from a glass carafe into a white ceramic mug. The carafe is covered in condensation droplets. The scene is set on a light blue surface with a piece of beige burlap fabric. Three coffee beans are scattered around: one on the left, one on the right, and one at the bottom center. The background is a plain, light-colored wall.

03 Revenue per time bucket

04 Revenue by Product Category

05 Sales Trend - Daily

06 Performance by time interval and store

07 Top 10 most performing products

08 Recommendations

Revenue per Month

Total revenue by month

INSIGHT:

Revenue increased strongly from R76,145 in February to R166,486 in June. The trend shows strong business growth, especially from March onward.

WE CAN USE THE INSIGHT TO IMPROVE

- **Identify what drove the growth from April to June and repeat those successful actions.**
- **Ensure staffing and inventory increase with demand.**
- **Investigate the February dip to prevent similar slowdowns.**

Store Performance

Total Revenue per store location

Insight:

Hell's Kitchen is the highest-revenue store at approximately R236,511, followed closely by Astoria at R232,244 and Lower Manhattan at R230,057. Performance is relatively balanced across locations.

WE CAN USE INSIGHTS TO:

- **Study Hell's Kitchen's best practices and apply them at the other stores.**
- **Because the stores are close in performance, focus on targeted improvements rather than major restructuring.**
- **Investigate why Lower Manhattan generates the lowest revenue but has high unit sales.**

Revenue per time bucket

Insight:

Morning sales dominate, generating about R388,289 in revenue. Night sales are extremely low at approximately R2,936.

How can we use these insights:

- **Prioritise staff, stock, and fast service during morning hours.**
- **Run breakfast promotions and bundle coffee with bakery items.**
- **Review whether late-night operating hours are profitable enough to justify staffing and operating costs.**

Category Performance

Revenue per product category

Insight:

Coffee is the largest revenue category at about R269,952, followed by Tea at R196,406. Bakery is a strong secondary category.

What to do:

- **Protect and grow the core Coffee and Tea categories.**
- **Create bundles such as Coffee + Bakery to increase average transaction value.**
- **Review lower-performing categories such as Packaged Chocolate and Flavours for pricing, promotion, or product-rationalisation opportunities.**

DAILY REVENUE

INSIGHTS:

Revenue stays within a narrow range across the week. Monday, Thursday, and Friday are slightly stronger, while Saturday is lower.

Performance by time & store

Peak sales by time interval and store

INSIGHTS:

This shows that the morning is performing best across all three stores, while the night is showing a little performance

TOP PERFORMING PRODUCTS

INSIGHTS:

Barista Espresso is the clear standout, with Brewed Chai Tea, Gourmet Beans, and House Blend also performing well.

RECOMMENDATIONS

1. Grow morning sales with speed and breakfast bundles

- **Introduce Coffee + Bakery breakfast bundles.**
- **Create a dedicated Express Morning Menu.**
- **Allow customers to order ahead where possible.**

2. Increase average spend through product bundling

- **Espresso + pastry bundle**
- **Coffee + muffin combo**
- **Tea + bakery afternoon special**

3. Turn afternoon and evening into stronger sales periods

- **Create an Afternoon Pick-Me-Up promotion.**
- **Offer iced coffee and cold beverages after lunch.**
- **Introduce coffee + dessert bundles.**

Thank You!
